HFC Benefits the Community

Students benefit from improved lifestyles and increased earnings. Taxpayers benefit from economic growth and lower social costs. The community as a whole benefits from increased job and investment opportunities, as well as higher business revenues.

Economic Impact

The impact of HFC on the local business community during the 2017 fiscal year amounted to $883 million, equal to the sum of the operations spending impact, the student spending impact, and the alumni impact. This added income was equal to approximately 0.4% of the region’s Gross Regional Product (GRP).

Total benefits to taxpayers are $365 million, equal to the sum of the added taxes and public sector savings. Comparing this to the taxpayer costs of $41 million—equal to the funding that HFC received from state and local government during the year—yields a benefit-cost ratio of 8.9. This means that for every $1 of public money invested in HFC, taxpayers receive a cumulative value of $8.90 over the course of the students’ working lives. The average annual rate of return is 26.2%, an investment that compares favorably with other long-term investments in both the private and public sectors.

In return for their investment, HFC’s students will receive a stream of higher future wages that will continue to grow throughout their working lives. The average associate degree graduate from HFC will see an increase in earnings of $11,700 each year compared to someone with a high school diploma or equivalent. Over the course of an HFC graduate’s working lifetime, this increase in earnings amounts to a value of approximately $468,000 in higher income.
